

YUSTIN EDUARDO PÉREZ CASTRO

Data Engineer | Analytics Engineer | Power BI Developer

perezcastroyus23@gmail.com | Alajuela, Costa Rica
linkedin.com/in/yustin-prz | github.com/yustin-prz | yustin-prz.vercel.app

Professional Summary

Data engineering and analytics-focused developer with hands-on internship experience building ETL/ELT pipelines in Power Query and Python, automating financial and operational reporting, and delivering Power BI (Business Intelligence) dashboards over datasets of 100,000+ records at DHL Shared Service Center Americas. Proficient in Python, SQL, Power Query, Apache Airflow, Apache Kafka, dbt and Docker, with a portfolio of 11 end-to-end projects spanning data warehousing, machine learning and REST APIs. Currently pursuing a Software Engineering degree. Bilingual: Spanish (native) and English (C1 Advanced).

Technical Skills

- **Data Analysis & Quality:** Python (Pandas), SQL (advanced), PostgreSQL, MySQL, SQL Server, DuckDB, Excel (VBA, pivot tables, Power Query)
- **Data Engineering:** Apache Airflow, Apache Kafka, dbt, Docker, ETL/ELT workflows, SQLAlchemy, REST APIs, Selenium, SSAS (OLAP cubes, Visual Studio)
- **Machine Learning:** XGBoost, Prophet, Random Forest, scikit-learn, feature engineering, model validation
- **Visualization & BI:** Power BI (DAX, data modeling), Streamlit, Plotly, Matplotlib, Power Query, executive dashboards
- **Backend & APIs:** Node.js, Express, REST APIs, Postman, C# (Windows Forms, ADO.NET)
- **Automation:** Excel VBA, Power Apps, Python scripting, Selenium, Apache Airflow
- **Cloud & DevOps:** Google Cloud Platform (GCP — in training), Docker, Git, GitHub
- **Other:** SAP (GUI), XML, JavaScript, TypeScript, Linux

Experience

Data Engineering Intern — DHL Shared Service Center Americas Oct 2025 – Present
Robotic Process Automation (RPA) & Innovation Team · Heredia, Costa Rica

- Developed analytical solutions for the Accounts Receivable (AR) team processing 100,000+ records, automating reconciliation, collections tracking and financial reporting workflows — improving data accuracy and on-time delivery to regional stakeholders.
- Re-engineered a critical data pipeline handling 100,000+ records, reducing execution time by 75% through automation and improved transformation logic. Originally built for Central America and the Caribbean, the solution is currently being scaled across South America (Argentina, Chile, Colombia, Peru, Brazil, Bolivia, Uruguay and Paraguay).
- Built interactive Power BI dashboards to monitor operational and financial KPIs (Key Performance Indicators) in real time, enabling management to track performance against targets and make faster data-driven decisions.
- Built data-transformation solutions in Power Query (M) and Python (Pandas) to extract, clean and validate structured data from source systems, ensuring data integrity across all reporting outputs.
- Automated recurring financial and operational reports using Excel VBA and Power Apps, reducing manual effort and improving process consistency across reporting cycles.
- Participated in automation projects using Selenium integrated with Python and SQL, expanding data-extraction capabilities across operational systems.
- Collaborated with Finance, Operations and IT teams to define data requirements, validate analytical outputs and communicate findings to both technical and non-technical stakeholders.

Web Developer (Freelance) May 2023 – May 2024
Remote

- Designed relational MySQL databases and built data-visualization dashboards that enabled 30 clients to track business performance and key metrics in real time.

- Translated client requirements into end-to-end data solutions, managing the full project lifecycle from requirements gathering through delivery and documentation.

Projects

11 end-to-end projects covering the full stack — data engineering, machine learning, REST APIs, desktop apps and analytics. Portfolio: yustin-prz.vercel.app · GitHub: github.com/yustin-prz

- **CryptoEdu — Machine Learning Platform:** full pipeline (CoinGecko API → PostgreSQL → Prophet + XGBoost → Streamlit web app); 10 engineered features (RSI, MACD, Bollinger Bands); 4 interactive educational pages with backtesting simulator and quiz.
- **Data Warehouse (dbt + DuckDB):** staging and marts architecture across 23 source tables (38,865 rows); 4 transformation models; 11 automated data-quality tests (all passing); lineage documentation.
- **ETL Orchestration (Apache Airflow + Docker):** automated daily DAG with extract, transform, load and validate tasks; retry logic and data-integrity checks on every run.
- **Real-Time Streaming (Apache Kafka + Docker):** producer/consumer pipeline processing 8 concurrent crypto price streams per second; 650+ events per session persisted to PostgreSQL.
- **SnackFlow (in progress):** full-stack food-ordering app built with JavaScript, Node.js, PostgreSQL and Docker.
- **Order Management API:** RESTful API built with Node.js, Express and PostgreSQL; full CRUD with layered architecture (routes, controllers, models, middleware).
- **RoadReady:** vehicle inspection management system in C# (Windows Forms) with layered architecture, Factory Pattern, ADO.NET, SQL Server and RDLC reports.
- **SQL Analysis (PostgreSQL):** 8 business questions on a 4,137-row financial dataset using CTEs, LAG(), CORR(), FILTER WHERE and UNION ALL.
- **US GDP vs Public Debt (1947–2020):** cleaned 295-row time series, engineered 7 features; 3-page Power BI executive dashboard.
- **Teen Mental Health Dashboard:** composite wellbeing index and risk segmentation for 1,200 records; 4-page interactive Power BI dashboard.
- **CR Job Market Analysis:** multi-source scraping pipeline (Selenium + JSearch API); market-trend analysis of data jobs in Costa Rica.

Education

Bachelor's Degree in Software Engineering

2025 – Expected 2026

Universidad Técnica Nacional · Costa Rica

Associate Degree in Information Technologies

2025

Universidad Técnica Nacional · Costa Rica

Certifications

- EF SET English Certificate C1 Advanced · EF Education First · June 2026
- Data Analytics Essentials · Cisco Networking Academy · May 2026
- Introduction to Data Science · Cisco Networking Academy · May 2026
- Fundamentos de Machine Learning · Capacítate para el Empleo / Fundación Carlos Slim · May 2026
- Python Essentials 1 & 2 · Cisco Networking Academy / Python Institute · Feb 2026
- Power BI Dual Certification · Udemy + Santander Open Academy · Jan–May 2025
- JavaScript Essentials 2 · Cisco Networking Academy / JavaScript Institute · Mar 2025
- Network Technician Career Path · Cisco Networking Academy · Jun 2025
- English for IT 1 · Cisco Networking Academy · Aug 2025
- Google Cloud Computing Foundations · Google Cloud Career Launchpad LATAM · In progress
