

YUSTIN EDUARDO PÉREZ CASTRO

Data Engineer | Analytics Engineer | Web Scraping

Alajuela, Costa Rica | perezcastroyus23@gmail.com
linkedin.com/in/yustin-prz | github.com/yustin-prz | yustin-prz.vercel.app

PROFILE

Data engineering-focused developer building ETL/ELT pipelines, web scraping systems and Power BI dashboards over 100,000+ record datasets. Currently at Equifax Costa Rica (GBS Web Scraping & Data Engineering), supporting CI/CD deployments and maintenance of production scrapers, after re-engineering a production pipeline at DHL that cut execution time by 75%. Proficient in Python, SQL, Apache Airflow, Apache Kafka, dbt, Docker, Kubernetes, AWS and Google Cloud Platform. Bilingual: Spanish (native) and English (C1 Advanced).

EDUCATION

Universidad Técnica Nacional, Costa Rica

2025 – Expected 2026

Bachelor's Degree in Software Engineering

Universidad Técnica Nacional, Costa Rica

2025

Associate Degree in Information Technologies

EXPERIENCE

Equifax Costa Rica

Jul 2026 – Present

Web Scraping & Data Engineering Intern

San José, Costa Rica

- Run CI/CD pipelines (Jenkins, GitHub) across a Docker/Kubernetes/AWS stack that keep Web Scraping data-collection services deploying reliably to production.
- Keep mission-critical data-extraction pipelines resilient against constantly shifting external sources — resolving structure changes, credential rotations and dependency drift before they break downstream reporting.
- Raised code-repository standards for the team, tightening version control practices and speeding up knowledge transfer.
- Protect the integrity of data feeding Equifax's global credit-information products — trusted by financial institutions worldwide — through systematic cleaning and validation.

DHL Express

Oct 2025 – Jul 2026

SSC Data Engineering Intern · RPA & Innovation Team

Heredia, Costa Rica

- Re-engineered a critical data pipeline processing 100,000+ daily records for the Accounts Receivable team, cutting execution time by 75%; solution scaled across 8 South American countries.
- Built interactive Power BI dashboards tracking financial and operational KPIs in real time, enabling faster data-driven decisions.
- Automated data extraction and reporting with Selenium, Power Query (M), Python (Pandas), Excel VBA and Power Apps.

Freelance

May 2023 – Apr 2024

Web Developer

Remote, Costa Rica

- Designed relational SQL Server databases and REST APIs; built data-visualization dashboards for client business tracking.

PROJECTS

11 open-source projects — data engineering, ML, BI and backend. Portfolio: yustin-prz.vercel.app | GitHub: github.com/yustin-prz

- Data Warehouse (dbt + DuckDB): staging/marts across 23 tables (38,865 rows), 11/11 data-quality tests passing.
- Real-Time Streaming (Apache Kafka + Docker): 8 concurrent price streams/sec, 650+ events persisted per session.
- ETL Orchestration (Apache Airflow + Docker): daily DAG with retry logic and data-integrity validation.

TECHNICAL SKILLS

Languages & SQL: Python, SQL, JavaScript, TypeScript, C#

Data Engineering: Apache Airflow, Apache Kafka, dbt, Docker, Kubernetes, ETL/ELT, SQLAlchemy

Databases: PostgreSQL, MySQL, SQL Server, DuckDB

BI & Machine Learning: Power BI (DAX), XGBoost, Prophet, scikit-learn, Streamlit

Cloud & DevOps: AWS, Google Cloud Platform (GCP), Jenkins, CI/CD, Git, GitHub

CERTIFICATIONS

Google Cloud Computing Foundations Certificate — Google Cloud (2026) · Data Analytics Essentials & Introduction to Data Science — Cisco Networking Academy (2026) · Python Essentials 1 & 2 — Cisco/Python Institute (2026) · Power BI Dual Certification — Udemy (2025) · Fundamentos de Machine Learning — Fundación Carlos Slim (2026)

LANGUAGES

Spanish (Native) · English (C1 Advanced — EF SET Certified; Writing C2 — TrueNorth by Rosetta Stone, 2026)
